

CSS5120: Computational Linguistics

Final Project Guidelines

This document outlines the requirements for the final presentation and final report, including submission details, suggested structure, and grading rubrics.

Final Presentation Guidelines

Time: 8 minutes plus 2 minutes Q&A per group.

Format: PowerPoint / PDF

Presentation Order: To be announced in class.

Note: All presentations will take place in class on May 6. Every student is required to participate in the presentation in order to receive project credit. The 8-minute limit will be strictly enforced, and presentations will be stopped at 8 minutes.

PPT Submission Deadline: May 6th, in class.

Suggested Slide Structure

1. Motivation & Importance (1 min)

- Briefly introduce the problem and why it is important.
- Provide real-world or research context.

2. Related Work (1 min)

- Summarize what has already been done in this area.
- Point out limitations in existing methods or models.

3. Your Contribution (1 min)

- Clearly state how your approach is different or better.
- Emphasize novelty or practical relevance.

4. Methodology (1.5 min)

- Explain your method or model concisely.
- Include visual aids if applicable (e.g., diagrams, equations, flowcharts).

5. Results (2.5 min)

- Show key findings with charts or visuals.
- Highlight what the results tell us.

6. Conclusion & Future Work (1 min)

- Wrap up with takeaways.
- Mention any limitations and propose directions for future work.

Presentation Rubric (20 points total)

Criterion	Points	Description
Motivation and Importance	2	Clearly introduces the problem and explains why it matters.
Related Work	1	Briefly summarizes relevant prior work or background.
Contribution	4	Clearly states the project's main contribution, novelty, or practical relevance.
Methodology	4	Explains the method or model clearly and logically.
Results and Analysis	4	Presents key results effectively and explains their meaning.
Presentation Quality and Delivery	3	Presentation is well-organized, clear, visually effective, and professionally delivered.
Timing and Q&A	2	Stays within the 8-minute limit and responds well to questions.

Final Report Guidelines

Format: PDF file + ZIP file containing code and data

Deadline: May 10th, the end of the day

Submission: Submit on bb, include report and code package

Report Structure

Please organize your report with the following sections:

1. Introduction

- Clearly state the problem you are solving.
- Explain why this problem matters (societal, theoretical, or practical importance).
- Summarize what others have done (existing literature, models, or tools). Highlight gaps or limitations in the current literature.
- Clearly state your innovation or contribution in this project.

2. Methodology

- Describe the approach you used to solve the problem.
- Include any models, algorithms, frameworks, or data sources.
- Justify your choices where appropriate.

3. Results

- Present the key results of your work.
- Use clear tables, graphs, or visuals to illustrate your findings. Explain what the results mean.

4. Discussion

- Reflect on the potential applications of your work.
- Discuss the limitations of your approach.
- Suggest possible improvements or next steps.

5. References

- Include any references cited in your work using a consistent citation format.

Code Submission

- Submit your code and data as a ZIP file.
- Include a README file that explains:
 - How to run your code
 - Any dependencies or environments required
 - Descriptions of key files or folders

Final Report Rubric (10 points total)

Criterion	Points	Description
Contribution & Innovation	3	The report addresses a meaningful problem and clearly explains the project's originality, contribution, or added value compared with existing work.
Methodological Soundness	2	The methodology is appropriate, technically sound, and clearly explained. Assumptions, tools, data, and algorithms are used

		correctly.
Results & Analysis	3	Results are presented clearly, supported by evidence, and interpreted thoughtfully. Limitations are discussed honestly.
Code Quality & Reproducibility	2	The code submission is organized, functional, and reproducible, with a clear README explaining how to run the code and use the data.
